Miroslava Chávez-García
University of California at Santa Barbara

Miroslava Chávez-García is Professor in the Department of History at the University of California at Santa Barbara and holds affiliate status in the Departments of Chicana and Chicano Studies and Feminist Studies. She is author of Negotiating Conquest: Gender and Power in California, 1770s to 1880s (University of Arizona Press, 2004) and States of Delinquency: Race and Science in the Making of California’s Juvenile Justice System (University of California Press, 2012). Her current book manuscript, Migrant Longing: Letter Writing across the U.S.-Mexico Borderlands, is a history of migration, courtship, and identity as told through more than 300 personal letters exchanged among family members in the 1960s and 1970s. The book will appear in May 2018 in the David J. Weber series in Borderlands history at the University of North Carolina Press. Miroslava has also published numerous articles on related topics of migration, juvenile justice, and Chicana history as well as on mentoring young scholars of color in academia.

Miroslava has received awards and fellowships from the Center for Comparative Studies in Race and Ethnicity at Stanford University, Ford Foundation for Diversity, and Organization of American History (OAH) and the Committee for the Germany Residency Program, which awarded her a residency at the University of Tübingen in 2016. Most recently, the Western Association of Women’s Historians awarded her the Judith Lee Ridge prize for the best article by any member of the organization for “Migrant Longing, Courtship, and Gendered Identity in the U.S.-Mexico Borderlands,” published by the Western History Quarterly in Summer 2016. In November 2017, that same essay received the Bolton-Cutter Award from the Western History Association for the best article on Spanish Borderlands history.
MARY WHITON CALKINS LECTURE

The Rehabilitative Ideal in California’s Early Juvenile Justice System: Promise and Reality

Miroslava Chávez-García
University of California at Santa Barbara

This talk examines how and why Whittier State School (later, the Fred C. Nelles Correctional Facility), once hailed as a premiere reform school of the early twentieth century in the United States, declined so significantly in its treatment of incarcerated boys. While the Progressive reform movement of the 1910s, under the leadership of Fred C. Nelles, had brought about dramatic changes in the policies and practices of the school, with the shift away from punitive approaches to rehabilitative ideals, by the late 1930s conditions had deteriorated so badly that two Mexican American boys, Benny Moreno and Edward Levia, committed suicide within twelve months of each other, in 1939 and 1940, respectively. Reform school administrators argued that the boys’ mental deficiencies contributed to their deaths, while former inmates, the boys’ family members, and Latina/o community activists charged unchecked and sustained physical, psychological, and sexual abuse.

Examining and analyzing a series of exhaustive investigations and a flood of reports in the English and Spanish language press reveals that state neglect, political battles, incompetent leadership, abusive conditions, and public apathy contributed to their deaths. The results of the probes into the boys’ death were the dismissal of key administrators and staff as well as the imprisonment of physically and sexually abusive personnel, the dismantling of juvenile corrections in the state, and the creation of the California Youth Authority in 1941. The boys’ suicides, though tragic were not in vain, for they brought long-overdue state and national attention to the needs of incarcerated children and youths, leading to the transformation of the juvenile correctional system and forming a legacy that continues to this day.
